

Insufficient Input Data

This document reports an error encountered while attempting to generate a revised Curriculum Vitae (CV).

Error Description

The process to generate a revised CV failed due to insufficient input data. This means that the necessary information required to create or update the CV was not provided.

Required Data

To successfully generate a CV, please provide the following information:

* **Contact Information:** Full name, phone number, email address, LinkedIn profile URL (optional), location (city and state). * **Work Experience:** For each role, include company name, job title, dates of employment (month/year - month/year), and a concise description of responsibilities and accomplishments using action verbs. Quantifiable achievements are highly recommended. * **Education:** Institution name, degree earned, major/minor, graduation date (or expected graduation date). Include GPA if above 3.5. * **Skills:** List both hard skills (e.g., programming languages, software proficiency) and soft skills (e.g., communication, teamwork). * **Projects (Optional):** Brief descriptions of relevant personal or academic projects, including technologies used and outcomes achieved. * **Awards and Recognition (Optional):** List any relevant awards or recognition received.

Next Steps

To proceed with CV generation, please supply the missing data outlined above. The more comprehensive the information provided, the more effective and impactful the resulting CV will be. Consider using a structured format such as a table for work experience and education to ensure clarity. Examples of suitable formats can be found online. Contact support if you require further assistance.
